Step 5 Terms and Conditions

Santee Cooper is implementing a Smart Energy Existing Homes program ("Program") to provide qualifying Customers ("Customers") with rebates to facilitate the installation of energy-efficient equipment, products, upgrades and services at their existing residential facilities. These Terms and Conditions set forth the participation requirements for Customers applying for rebates through the Program. By signing below, the Customer named in the Rebate Application ("Customer") is agreeing to comply with and be bound by these terms.

Santee Cooper has contracted with and authorized Resource Innovations, Inc. ("Resource Innovations") to assist with this Program as needed to include, but not limited to the following activities: facilitating project information requests from Customers and Trade Allies and offering technical support to Santee Cooper and conducting measurement and verification activities.

Trade Allies. Customers are required to use a vendor or installer who is a member of Santee Cooper's Residential Trade Ally network ("Trade Ally") for the purchase and installation of all the energy-efficiency measures offered by the Program, except Heat Pump Water Heaters and Smart Thermostats. Contractors installing heat pump water heaters must have a South Carolina Plumbing Contractor's License. Trade Allies are independent contractors with respect to the Program and are not authorized to make representations or incur obligations on behalf of Santee Cooper. Participation as a Trade Ally does not constitute an endorsement by Santee Cooper, nor does it certify or guarantee the quality of work performed. A listing of Trade Allies is available online at www.santeecooper.com/ResidentialTradeAlly.

Program Funding. The Program Year runs from December 1, to November 30, Program funds are limited and rebates are subject to funding availability. Rebate applications are accepted on a first-come, first-served basis until the conclusion of the Program term, or until Program funds are no longer available. Customers requesting rebates after all available Program funding for the Program term is committed will be offered the option to be placed on a waiting list in the order that the applications are received by Santee Cooper for consideration should the Program term be extended or additional funding becomes available.

Customer and Measure Eligibility. To be eligible for the Program, applicants must meet the customer and equipment eligibility requirements as set forth in the Santee Cooper Smart Energy for Existing Homes Program Manual ("Program Manual") incorporated herein by reference. Customer must be the owner of the home or be authorized by the owner(s) to implement the Program qualifying upgrades and installations. Customers who have received rebates through the Program for eligible measures are not eligible to receive rebates related to those measures through any other program for the period specified in the Measure Ineligibility Periods table as provided in the Program Manual.

Program Participation Process. Customer must complete the Program participation process as outlined in more detail in the Program Manual. This process includes, but is not limited to, Customer complying with the following:

1. Customer must use a Trade Ally to purchase and complete the installation of qualifying measures offered by the Program, with the exception of Heat Pump Water Heaters and Smart Thermostats
2. Customer must complete and submit the Rebate Application and all required documentation (collectively the "Rebate Application") within 30 business days after the measures are installed or completed in order to be eligible for rebates. The Rebate Application is incorporated herein by reference.

Rebate Application. Customers applying for measures installed during the Program year must submit the Rebate Application and required documentation by November 30, and in accordance with Program requirements. Please see the Program Manual for details regarding required documentation. Customer understands that submission of an application, even if correct and complete, does not guarantee payment of rebates.

Rebate Payments. Rebates for the implementation of the qualifying equipment are listed in the Rebate Estimatotable of this Rebate Application and in the Program Manual. Rebate payments are one-time only. Eligible project costs are defined as the actual costs incurred by the customer for the evaluation, construction, installation, implementation, and commiss
